**This position is based in Prague, the Czech Republic. Please make sure you have valid working visa.**

**ARE YOU READY TO WORK AT PRIMEREVENUE?**

Do you want to work for a high growth, FinTech company helping other companies innovate, grow and create jobs? Do you enjoy working within an entrepreneurial environment that is mission-driven, results-driven and community oriented? We're looking for an energetic, organized and highly motivated Software Engineer Intern.

PrimeRevenue is the leader in technology-enabled working capital solutions, optimizing cash flow for more than 20,000 customers in over 70 countries. In the past 12 months, we've processed more than \$180 billion in supply chain transaction volume on our platform. Headquartered in Atlanta, with offices in Prague, London and Hong Kong, we provide a global reach to serve customers with local market knowledge and expertise.

Recognized as a Best and Brightest Company to Work For and winner of numerous prestigious industry awards, PrimeRevenue offers a challenging, rewarding, and truly entrepreneurial work environment. We're an established financial technology industry leader, and we want great people along for the ride. Our TEAM is the most important and integral part of our business. We don't just offer jobs. We offer careers.

Our multicultural workplaces offer outstanding opportunities for professional and personal development. Like most successful companies, you'll find people who are highly intelligent, motivated, fun-loving and above all, ethical. What really differentiates us from other companies, however, are our Values. We believe they are critical components to hiring and motivating the right individuals and ultimately drive our long-term success. Our values are built upon what we call PRIDE + Integrity -- Performance, Respect, Innovation, Diversity, Excellence and, above all, Integrity. At PrimeRevenue, you will work with a great TEAM that is pursuing a massive overall opportunity.

## Responsibilities

### WHAT YOU GET TO DO:

- Develop new features and improvements using Java and older Spring UI frameworks
- Learn PrimeRevenue's backend frameworks
- Learn and understand a portion of PrimeRevenue's legacy application infrastructure to support our application
- Unit test Java code before checking into source control
- Follow agile practices (we use SCRUM and Kanban)
- Deliver code to specifications
- Take an interest in technical and business training
- Participate in our scrum process
- Understand our deployment process
- Actively work to make our products better through:
  - Research of new technology and design
  - Identification of improvement areas for products
  - Utilization of best practices
- Contribute to the development of products through
- Daily hands-on development
- Use of automated testing
- Review of work by other engineers on the TEAM

## Qualifications

### WHAT ARE WE LOOKING FOR?

#### MUST HAVE:

- **Engineering degree (graduated or in progress)**
- Proficient in English (C1 or higher)
- Logical thinking
- Problem solving skills
- Experience with Java and JavaScript
- Understanding of HTML, XML, JSON
- Experience with SQL and relational databases
- Experience with Git

#### NICE TO HAVE:

- Understanding of Agile methodology
- Understanding of Code Review process
- Understanding of Microservice Architectures

- Familiarity with RESTful services
- Familiarity with Spring Framework
- Experience with modern JavaScript frameworks like Vue.js or React

**WHO ARE YOU?**

**SMART, HUNGRY, HUMBLE personality is a must!**
