

# Table of rules for the recognition of courses between programs

The table specifies the rules for the recognition of courses between the **old** and the **new** bachelor program in Informatics.

Courses are mutually recognized between the programs according to the following rules:

- Courses with the same abbreviation (but different "suffix") are equivalent and mutually recognizable, e.g. courses BIE-PA1 and BIE-PA1.21.
- Other courses are recognized according to this table. You can also recognize one course for two, two for one or take an additional exam.
